

PROFESSIONAL SUMMARY — ADVISORY BRIEF

Brent Marshall

Strategic Advisor & Operator · SOE Performance, Sustainable Infrastructure & Technology Transfer

BASED IN JAKARTA, INDONESIA · AVAILABLE FOR ADVISORY CONTRIBUTION & TRAVEL

Four-decade operator who built a struggling regional dealership into Canada's #1-volume franchise, then helped found what became AutoCanada (TSX: ACQ), now a \$5.3B+ national platform. 45 companies built or operated across a dozen regulated industries — automotive, aviation, emergency services, energy technology. Since relocating to Indonesia, has been developing an open-source, locally buildable plastic-to-fuel and waste-briquetting system on an island 75 minutes from Jakarta — a live proof-of-concept for coastal energy security and circular-economy technology transfer requiring no significant capital outlay. Seeking an advisory role where decades of turnaround, industrialization, and technology-commercialization experience can support Indonesia's national investment and sustainable-development priorities.

RELEVANT EXPERIENCE**Operational Turnarounds & Asset Optimization**

Rebuilt an underperforming dealership into a national #1 performer sustained 14 years; founding operator in the group that became a \$5.3B public company.

Multi-Company Portfolio Management

Simultaneously operated businesses across automotive, aviation, emergency services, and energy technology — disciplined multi-P&L accountability, not sequential career-hopping.

Technology Commercialization & Market Entry

Currently bridging Chinese EV, eVTOL, and self-driving technology into North America; developing open-source pyrolysis and briquetting systems field-proven on Indonesian soil.

Aviation & Mobility Infrastructure

Negotiated the expansion of Boeing's Worldwide Rotatable Programs as President of Tempest Aviation Group; selected by PACCAR to evaluate next-gen EV/hydrogen Class 1 trucks.

Large-Scale Team Development

Decades recruiting and training staff who went on to help build AutoCanada into a national platform — many still with the company today.

Community & Infrastructure Impact

\$50M+ returned to communities as a structural mandate on every business built; sustained multi-year leadership on major charitable and public-health initiatives.

"Brent's performance and philanthropy set records and a new benchmark for automotive dealerships."

— Dave Buckingham, then-President, Chrysler Canada
